

## **CLAIM AMENDMENTS**

Claims 1-17 (Cancelled)

18.(New) A portable device for use during a beauty treatment provided to a person's limbs comprising:

base means (6) for supporting the device (1) on a substantially plane and horizontal surface,

a first support (2) for supporting at least one limb portion to allow an operator to perform the beauty treatment on said limb portion, said operator using tools on said limb portion, applying products and materials to said limb portions during said beauty treatment;

aspirator means (3) for withdrawing air from an area where the beauty treatment is performed so as to remove air containing powders, vapors and gasses emitted during the beauty treatment, and for purifying the air by removing said powders, vapors and gasses, the purified air reintroduced to the environment through the base means, the aspirator means (3) being located below the first support (2), an edge (7) of the first support being close to and facing the aspirator means (3), the aspirator means including a motorized fan (8) and filtering means (9), the motorized fan withdrawing the air and delivering the air to the filtering means for purifying the air, the filtering means having an upper portion which forms a second support (10) for the at least one limb portion, and,  
a set of lamps (4) for use in the beauty treatment.

19.(New) The device according to claim 18 wherein the first support (2) has a convex shape and a surface sized to support two hands or two feet thereon.

20.(New) The device according to claim 18 further comprising a cavity (11) for receiving at least one hand or one foot therein, the set of lamps (4) housed in the cavity (11).

21.(New) The device according to claim 18 wherein the set of lamps (4) emit light of a spectrum effective in polymerization or hardening of products applied to finger or toe nails.

22.(New) The device according to claim 18 further comprising removable containers (12) for containing products used for the beauty treatment.

23.(New) The device according to claim 22 further comprising wrist support means (13) for supporting a wrist, the wrist support means located adjacent to the removable containers (12).

24.(New) The device according to claim 18 further comprising ultrasonic means for promoting removal of false nails, nail varnishes, resins, and similar products from

finger nails.

25.(New) The device according to claim 24 wherein the ultrasonic means are associated with a container for a liquid, the container receiving the fingernails therein.

26.(New) The device according to claim 24 further comprising a timer (5) for controlling the time during which the ultrasonic means are active.

27.(New) The device according to claim 18 further comprising a timer (5) for controlling the time during which power is supplied to the set of lamps (4).

28.(New) The device according to claim 18 further comprising a handle (16).

29.(New) The device according to claim 18 further comprising a switchboard (20) having at least one on-off switch (21), one power supply jack (22) and one rheostat (23).

30.(New) The device according to claim 29 further comprising a supply transformer for supplying power to said power supply jack, the power supply jack being connectable with external tools usable in the beauty treatment.

31.(New) The device according to claim 20 further comprising an eyelid portion (24) located at an upper external edge of said cavity (11), the eyelid portion disposed for protecting the set of lamps (4).

32.(New) The device according to claim 18 further comprising side walls having hinged portions (25).
